WORK EXPERIENCE

Working as an Engineer at Virtusa from May 2019 - till date

Role: Played as a Quality Analyst & performed various task like Requirement Analysis, Involving in Function testing, Validation, Regression testing, Preparation & Execution of Selenium Automation scripts and deploying in ALM.

PROJECT DETAILS

PROJECT 1: CCBCR QA Transformation (BMO)

DURATION: Sep 2019 to Oct 2020

PROJECT DESCRIPTION:

- LOANIQ is the highly structured syndicated lending to high volume bilateral lending to meet all loan processing system requirements.
- I have created a automation test script using VB Script in UFT to test the functionality of all the accounts a customer holds to ensure the security of the customer by testing the user interfaces & back-end services.
- I worked in batch processing where i will write SQL statements into a batch.

PROJECT 2: Service-Now (BMO)

DURATION: Nov 2020 to date

PROJECT DESCRIPTION:

- Service Now is a ticketing system for resolving internal IT issues.
- I created automation scripts for the user stories using Selenium Webdriver.
- Working in Agile model. Also did manual testing for user requirements stories.
- Worked in ATF(Automated Test Framework) inbuilt framework in Service-Now.
- Handling hybrid framework for Selenium scripts creation and execution.
- Various activities including regression execution, Smoke testing, pushing latest suites to GIT.
